Collaborative Research Center for American Indian Health

Pilot Grant Services

Overview

- CRCAIH Description

- Pilot Grants Purpose & Process

- Administrative Division – DenYelle Kenyon

- Community Engagement and Innovation Division – Jen Prasek

- Regulatory Knowledge Core – Jyoti Angal

- Methodology Core – Susan Puumala

- Culture, Science, and Bioethics Core – Jana Prasek

- Question and Answer Period

CRCAIH Mission

- The Collaborative Research Center for American Indian Health (CRCAIH) is designed to create a platform to bring together Tribal communities and health researchers, from multiple disciplines, to work together in the development of cutting-edge transdisciplinary research that will address the significant health disparities experienced by American Indians in SD, ND, and MN.

Purpose

- To fund cutting-edge **transdisciplinary** research that will address the significant health disparities experienced by American Indians in South Dakota, North Dakota and Minnesota.

- Projects will embrace a **"social determinants of health"** theme leading to the improvement of **American Indian health**.

- Have a strong potential for future funding, including sustainability and growth of the project.

Last, First, MI   CRCAIH Pilot Grants Program
                                                                          Application 2014

Collaborative Research Center for American Indian Health
Pilot Grants Program
Application 2014
Funding Period: August 1, 2014 – July 31, 2015

1. Cover Sheet

Proposal Information
Title: _____

(Do not exceed 81 characters, including spaces)

Type of Application: ☐ New   ☐ Revised, last submitted: _____

Funds Requested: Direct $_____   Indirect: $_____   Total: $_____
NOTE: Projects should have proposed budgets of $25,000-$80,000 (Direct Costs). F&A Costs – indirect costs – are allowed at the applicant Institution's current approved negotiated rate.

Has this or a related project received prior funding (internal or external)?
☐ Yes   ☐ No
If yes, do the project aims overlap with the proposed project? Explain: _____

Applicant Organization
Legal Address/Information
Organizational DUNS:_____   Employer Identification (EIN) or (TIN):_____
Legal Name: _____
Division: _____   Department: _____
Address: _____
City, State, Zip (+4):_____   Congressional District:_____

Type of Organization
Public   ⟶   ☐ Federal   ☐ State   ☐ Local
Private   ⟶   ☐ Private Nonprofit
For-Profit   ⟶   ☐ General   ☐ Small Business
☐ Women-owned   ☐ Socially and Economically Disadvantaged

Authorized Organization Representative/Signing Official Contact Information
Name: _____
Title:_____
Mailing address:_____
Telephone number:_____   Email address:_____

Principal Investigator
Name:_____
Division:_____   Department:_____
Mailing address:_____
City, State, Zip (+4):_____
Telephone number:_____   Email address:_____

Collaborative Research Center for American Indian Health

ADMINISTRATIVE DIVISION

Administrative Division

The Administrative Division of the Collaborative Research Center for American Indian Health was created to provide leadership and guidance in all areas grant management and transdisciplinary research.

The facilitation of partner engagement is a top priority of the Administration to ensure bi-directional communication throughout the center and with external partners.
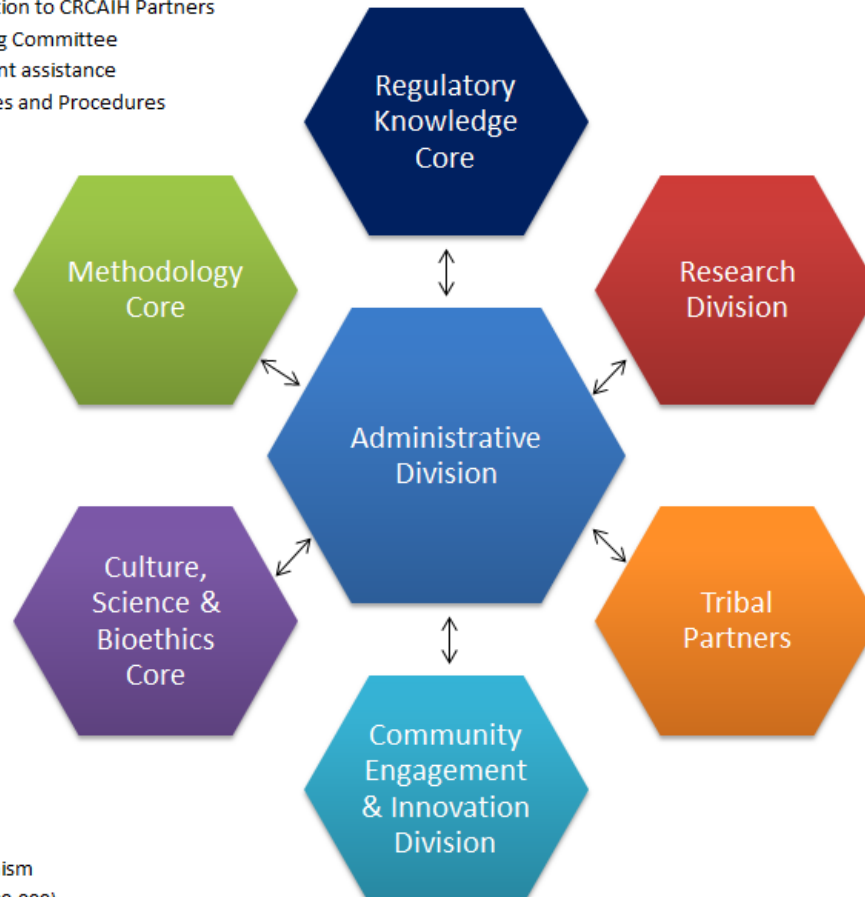

Administrative Division Functions

Management:
Provide oversight and direction to CRCAIH Partners
Executive Steering Committee
Fiscal management assistance
Development of Policies and Procedures

Evaluation:
Strategic Planning
Logic Model
Evaluation Services
Reporting

Regulatory Knowledge Core

Methodology Core

Research Division

Administrative Division

Culture, Science & Bioethics Core

Tribal Partners

Community Engagement & Innovation Division

Pilot Grants:
Annual Funding Mechanism
Funding Levels ($25,000-$80,000)

Annual Summit:
Trainings
National Speakers
Networking

Collaborative Research Center for American Indian Health

Administrative Division Service Examples

- Determination of pilot project & investigator eligibility

- Help frame study idea to mission/purpose of pilot grants

- Discussing emphasis of important elements of proposal

- Discussing response to reviewer feedback

- Assistance in designing research questions & hypotheses

- Budgeting; discuss scale of study design to fit budget

- Connecting interested investigators

- Designing logic models, strategic planning

- Support in development of evaluation plan and measures

Community Engagement & Innovation (CEID)

Committed to engaging communities to help:

- establish American Indian health priorities
- build community capacity for research by increasing knowledge and trust in research

These activities will drive the CRCAIH research agenda and improve AI health through transdisciplinary research on social determinants of health in the ND, SD, and MN regions

Community Engagement & Innovation Service Examples

- Discussion of interested community collaborators

- Input on how to utilize CBPR methodologies

- Provide basic information on community partners

- Assist with making introductions between applicant and community collaborators

- Input on essential steps in collaboration

- Review abstract/prose, provide feedback

Collaborative Research Center for American Indian Health

REGULATORY KNOWLEDGE CORE

Regulatory Knowledge Core (RKC)

We aim to:

1) Provide regulatory support to investigators to help ensure integrity of data and protection of human subjects.

2) Facilitate the development of Tribal research regulation processes

Regulatory Knowledge Core Functions

Regulatory Core Service Examples

IRB SUBMISSION ASSISTANCE

- How many IRBs need to review my protocol?

RKC can help determine which IRB/RRB reviews needed. This can be particularly challenging when your research project is multi-site.

- Where will I find the materials required for IRB submission?

RKC can help you locate and fill out the correct IRB/RRB paperwork

- How can I reduce the IRB review burden?

RKC can help you identify options.

For example, we provide:

      -Assistance with development of MOU/MOAs

      -Assistance with obtaining IRB/RRB agreements

Regulatory Core Service Examples

ETHICAL QUESTIONS RELATED TO STUDY DESIGN

- What do I need to keep in mind when designing the informed consent process?

- Is the incentive given to the participants adequate?

- How can I use previously collected data?

RKC can help you answer these questions. The guidance that we provide will be tailored to the specifics of your research project.

Collaborative Research Center for American Indian Health

METHODOLOGY CORE
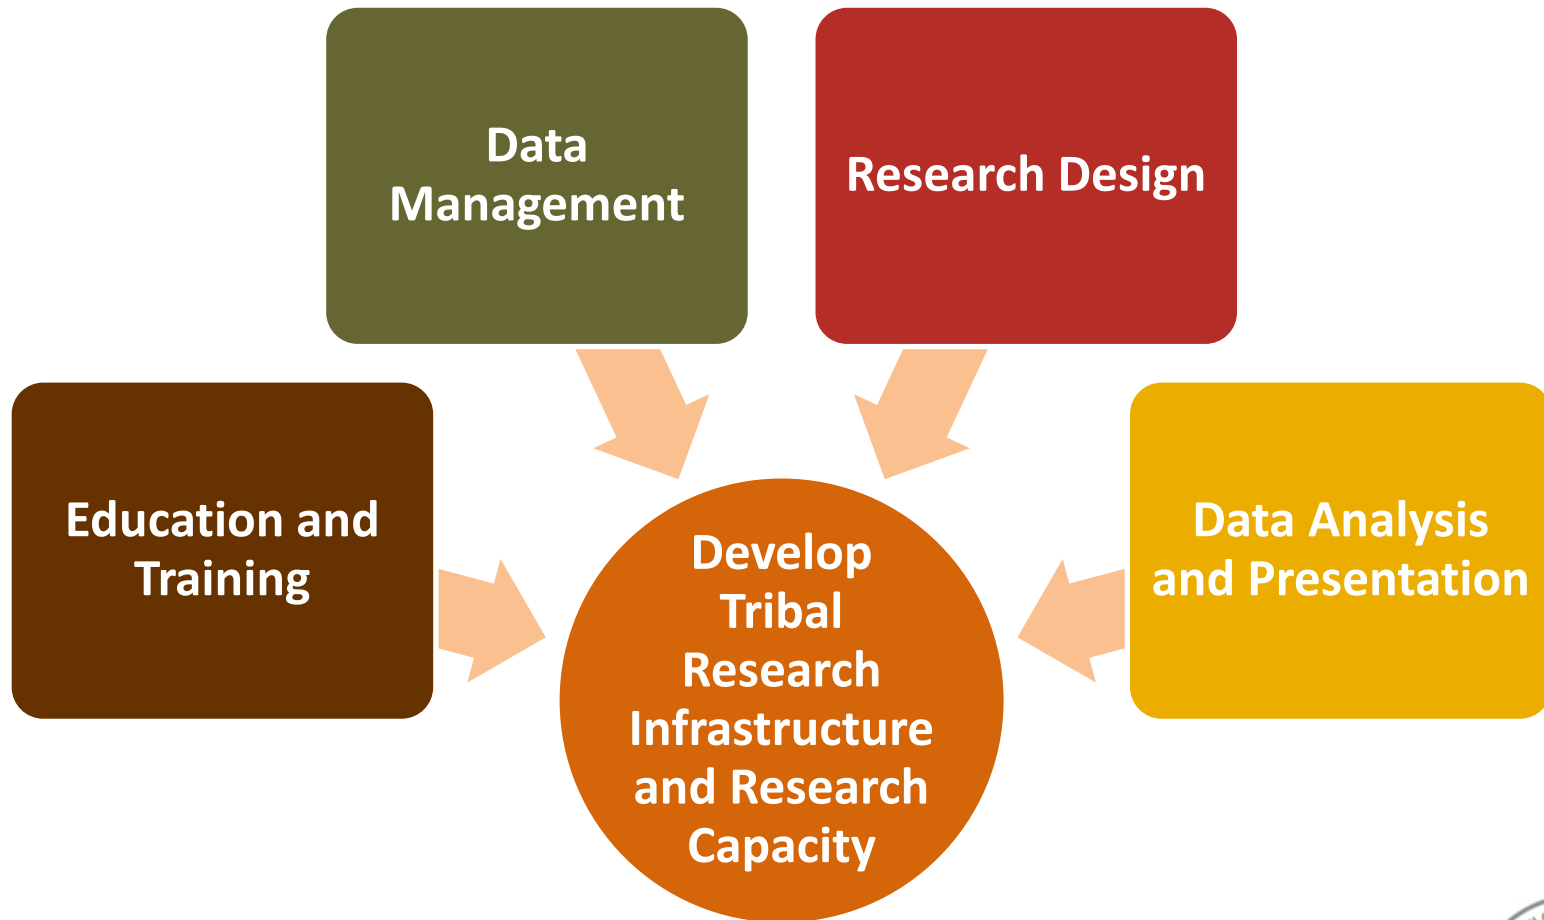

Methodology Core

We offer support for research and research infrastructure building.

Our goal is to work with our partners to understand their current interests and help identify collaboration and training needs so that we can work together to enhance their research.

We want expertise on research methods to be more accessible, to enrich our partners knowledge, and provide resources and collaborative opportunities.

Methodology Core Functions

Data Management

Research Design

Education and Training

Develop Tribal Research Infrastructure and Research Capacity

Data Analysis and Presentation

Collaborative Research Center for American Indian Health

Methodology Core Service Examples

- Study design

- Outcome design

- Measurement issues

- Power/Sample size

- Statistical methods design

- Review of grant abstract/prose

- Data Analysis

- Summary reports

- Interpretation of completed analysis

Collaborative Research Center for American Indian Health

CULTURE, SCIENCE & BIOETHICS CORE

Culture, Science & Bioethics Core

Assist our internal and external partners in furthering community-based participatory research (CBPR)

- Developing an educational training model that will integrate educational materials, protocols and codes of etiquette that are specifically targeted for tribal communities and health researchers.
  - Create the educational ground work and develop vital relationships crucial to successfully conducting important research in social determinant of health

Culture Science and Bioethics Core Service Examples

- Provide input on:
  - Relevancy of research with tribal communities, and designing the project to be more culturally-relevant
  - How best to utilize CBPR methodologies
  - Observing cultural protocols in research
  - The impact of research

- Advise on approaching communities
  - how to keep a project sustainable
  - Provide examples of logistics and feasibility of working within communities

Temana Andalcio, Petra Aldridge, Charlee Archambault, Amy Baete, Leah Bangston, Cody Bassett, Oran Beaulieu, Liz Belt, Lyle Best, Katie Burgess, Pat Butler, Community Advisory Board Members, Denise Casillas, Dorothy Castille, Carol Davis, Jackie Dionne , Amy Elliott, Chuck Ells, Anita Frederick, Nancy Fahrenwald, Mary Fairbanks , Char Green, Ronda Hinsch, Carrie Jenson, Doris Jones, William Kendall, Jenna Klepatz, Cindy Giago, John Gonzalez, Angela Gora, Jacque Gray, Jeaneen Grey Eagle, Victoria Grey Owl, Jessica Hanson, Sherlynn Herrera, Ann Marie Hess, Tiffany Hommes, H. Eugene Hoyme, Sarah Hutton, Sara Jumping Eagle, Anupam Kharbanda, Deleen Kougl, Warren Larsen, Tabatha Lemke, Luke Mack, Molly McGrane, Tracey McMahon, Jay Memmott, Tina Merdanian, Roxi Miller, Amanda Mitchell, Carty Monette, Paula Morin-Carter, Alicia Mousseau, Marcia O'Leary, Rae O'Leary, Rob Payne, Dan Petereit, Robin Peterson-Lund, Kathy Prasek, Wyatt Pickner, Rick Reuwsaat, Soonhee Roh, Michael H. Sayre, Lisa Schrader-Dillon, Derrick Tabor, Nathan Tesche, Thavam Thambi-Pillai, Gene Thin Elk, Paul Thompson, Anton Treuer, H. Bruce Vogt, James Wallace, Don Warne, Charish Weeldreyer, Siobhan Wescott, Howard Wey, Jim White, Emily White Hat, Jerry Yutrzenka, Marie Zephier, & Li Zhong.
